WEAK DEMAND, SUGAR STABLE, CURSHING BEGAN

Sugar prices have been weakened in major domestic markets of India due to weak demand and crushing began for the new season. Sugar prices likely to remain stable as new seasons crushing operations started and available in sufficient quantity to meet the demand.

PALM OIL FUTURES WEAK ON HIGHER INVENTORIES

Malaysian palm oil futures weak on higher inventories and lower exports. Inventories reached highest level after 2019 according to the news sources. As exports are at slower pace their production inventories have been increased. As production pace likely to come down in 2024 due to adverse climate affect prices are likely to rise on the period. During 2024 production in Indonesia also likely to drop according to analysts, prices are expected to increase during 2024. Soybean production also likely to drop and would support for increasing prices.

CASHEW KERNELS PRICES NOT INCREASING DESPITE OF FESTIVAL DEMAND

Despite of festival demand cashew kernels prices are not increasing in domestic market. Adequate quantity of stocks are with processors and despite increasing demand prices have not increased. Due to higher supply prices are not increasing according to the news sources. Due to Adequate supply, Global price also lower from last year. Processing of cashews are also increasing in African countries. Processed cashew export from Vietnam are increasing in the global market.

ARECANUT PRICES WEEK

Arecanut prices are comparatively lower from last seasons corresponding current season and also remained lower throughout from last years price. Availability of imported arecanut, lower demand and adequate supply pushed down the price. Arrivals from current new season have been began and likely to increase in quantity from next month. Usually prices of choll variety increase during september onwards but this year not increased, instead prices have been decreased. Arrivals likely to decrease at lower prices. Overall new crop production during this year likely to be lower due to adverse weather affect.
