

Draw a use case diagram of a student registration system. The system will enable the student to add courses. A drop course option should be enabled. Student may view registered courses either by display or print. Student also can send notification to make appointment with the lecturer. Lecturer can view student registration whereby he/she can view only his/her own taught course. Lecturer can have option to print the student registration list. Lecturer can make announcement and have the option to acknowledge appointment to the student. Nevertheless, lecturer neither create nor remove courses. This job is under the responsibility of the administrator who can create a new semester. Administrator should provide an option to remove courses.

[Include also boundary]

Student Registration System
